Attività di apprendimento previste e metodologie di insegnamento

Students will be exposed to a wide-range of text types and sources related to healthcare and nursing through which they will also be able to focus on developing scientific reading skills.

Specific language points will be explained and practised in context and according to the needs of the students. Students will also work on public speaking and oral presentation skills.

Classes will consist of teacher input and students working on language tasks through individual work, pair work, small group discussions as well as role-plays. Lessons will be delivered on TEAMS and ON DEMAND.

- Materials will be provided on LMS
- J. D'Andria Ursoleo, K. Gralton, Medical and Scientific English, Pearson, 2020 (ISBN:9788891916068)
